
MEMORANDUM

TO: ARCHITECTS & ENGINEERS SUBMITTING EXPRESSIONS
OF INTEREST (EOI)

FROM: MARYLAND TRANSIT ADMINISTRATION

DATE: APRIL 20, 2026

SUBJECT: ADDENDUM NO. 1

This is ADDENDUM No. 1 to the Expressions of Interest (EOI) for Contract Nos.
AE-25-001-A,B,C,D&E, Open-End Trackwork Engineering Services.

Attached regarding the subject procurement are Questions and Answers and correction / revision
to EOI.

The Closing Date for receipt of Expressions of Interest remains the same, May 1, 2026.

Should you have any questions concerning this matter, please contact me at 410-767-3354.

Contract Nos. AE-25-001-A,B,C,D&E
Open-End Trackwork Engineering Services

Questions and Answers

	Questions	Answers
1.	Question: We respectfully request clarification regarding the key staff requirements specified under RFP Section 5, Documentation Requirements (pg. 7) of the RFP. The RFP states that Key Staff positions 2 through 4 (Trackwork Engineer, Civil Engineer, and Structural Engineer) shall be employees of the Prime/Joint Venture. However, Section 5.b.1 indicates that the Project Manager must be an employee of the Prime/JV and Section 5.b.2 indicates that "it is not required that the remaining Key Staff personnel be employee of the Prime/JV or be located at the Project Office.	Answer: The Expression of Interest (EOI) requirement is that the Project Manager and Key Staff positions 2 through 4 must be employees of the Prime Consultant or Joint Venture. Section 5.b.2 applies only to remaining Key Staff personnel not specifically required elsewhere in the EOI to be Prime/JV employees. Proposers shall staff their teams accordingly.
2.	Question: Could MTA please clarify whether positions 2 through 4 must be Prime/Joint Venture employees, or if these positions may be filled by subconsultant personnel? We note that under the current contracts (AE-19-003-A, B, C & D), there is no requirement for these specific positions to be Prime/Joint Venture employees We would greatly appreciate a timely response to this question, as proposing teams have carefully structured their team compositions and key personnel assignments in preparation for this solicitation assuming that any of the key staff except the Project Manager can come from any team member firm. Understanding this requirement is essential to ensuring compliance and avoiding the need for significant team restructuring during the proposal development period.	Answer: See Response to Question #1

3.	Question: When opening the PDF file, EOI_ - _033126, the tab says "SAMPLE EOI (DO NOT USE). Please confirm the provided file is correct.	Answer: Yes, the file provided is correct.
4.	Question: Please confirm if the due date/time of the EOI is 12PM or 2PM on May 1st. Page 12 states to <i>"Respond by: May 1, 2026 prior to 2:00 noon (Eastern Standard Time)"</i>	Answer: Due date / time of EOI is 2 PM on May 1, 2026. Addendum No. 1 will address the issues.
5.	Question: Will the five awardees be expected to compete for each task order issued by the MTA? If so, could you please specify whether the selection process will be qualification-based or based on best value, incorporating both technical and fee considerations?	Answer: Secondary competition is not anticipated for each work order. However, if the Agency determines that a work order proposal reflects unreasonable or excessive pricing, including unsupported escalations, relative to the proposed personnel, qualifications, or scope of the task order, the Agency reserves the right to request proposals from the other awarded firms. Work order procurements will be conducted in accordance with the solicitation and applicable MTA requirements, and the evaluation criteria, including any fee considerations, will be set forth in the applicable work order request.
6.	Question: Additionally, we are interested in understanding the proposed contracting model for this engagement. Will it follow a cost plus fixed fee (CPFF) structure, or will it be a lump sum arrangement? If CPFF is planned, could you share the fixed fee percentage that will be applied?	Answer: This procurement is a cost-plus fixed fee (CPFF) structure. The fixed fee percentage is not applied to EOI stage of the solicitation.
7.	Question: On the SF330 Part F (Projects), can we list the "Firms from Section C involved with this project" on a second page?	Answer: Yes, the "Firms from Section C involved with this project" may be continued onto a second page, if necessary, provided the project information remains clear and complete.
8.	Question: Please confirm the time the EOI is due on May 1, 2026? Is it noon or 2pm?	Answer: Due date / time of EOI is 2 PM on May 1, 2026. Addendum No. 1 will address the issues.

9.	Question: Can we include the organization chart on an 11x17 sheet size for Part I.D. of SF330?	Answer: Yes
10.	Question: Should we include SF330 Part II forms for all subconsultants on our team or only from the prime consultants?	Answer: SF30 Part II is for Prime Consultant and all subconsultants on your team
11.	Question: Pages 2 and 6 of the Request for Professional Services state that one original and three copies of the Expression of Interest are to be submitted along with one electronic version. Page 6 also states that the front covers must be marked as “Original”. Please clarify that only one original should be marked as “Original” and if the other three copies should be marked as “Copy”.	Answer: One (1) original marked original. Three (3) copies should be marked copy.
12.	Question: Please confirm the EOI due date and time. Page 12 references May 1 @ 2:00 <i>noon</i> (Eastern Standard Time).	Answer: Due date / time of EOI is 2 PM on May 1, 2026. Addendum No. 1 will address the issues.
13.	Question: Item 1. Project Description, 3rd paragraph, EOI page 3 – Is the contract value total for all 5 contracts \$50,000,000 or the value of each contract is \$50,000,000? Please clarify.	Answer: Five (5) contracts for a five (5) year duration and not to exceed Ten Million Dollars (\$10,000,000) each
14.	Question: Items 5a and 5b. Documentation Requirements, EOI page 6 (Key Staff) – There is conflicting information on one of the key staff requirements between 5a and 5b. 5a lists key staff requirements for each position and includes a requirement that they all be members of the Prime/JV, though the Track Inspector may be an employee of a subconsultant. 5b states that the Project Manager must be a member of the Prime/JV but the others do not have to be. Could the specific requirements for the key staff please be clarified?	Answer: The EOI requirement is that the Project Manager and all Key Staff identified in Item 5a must be employees of the Prime Consultant or Joint Venture, except for the Track Inspector, who may be an employee of a subconsultant as stated in the EOI. Item 5b is intended to address office location and general staffing arrangements and does not supersede the specific employment requirements in Item 5a. Proposers shall staff their teams accordingly.

15.	Question: Item 5c. Documentation Requirements, EOI page 8 (Example Projects) – With the 5-project limitation, if JV partners work on the same contract can their combined work on the contract be shown as one project?	Answer: Yes, if JV partners worked on the same contract, their combined experience on that contract may be submitted as one project toward the 5-project limit, provided the submission clearly identifies the role and responsibilities of each JV partner.
16.	Question: Item 10.b. Rating Criteria, EOI page 9, “Response to Scope of Services: Technical Approach, Project Understanding, and Work Plan” – We do not see a specific location or page limitation for these sections. Is it MTA’s intent to have those areas covered in the SF 330 Part I. Section H.	Answer: Yes, it is MTA’s intent that information addressing Technical Approach, Project Understanding, and Work Plan be included in SF 330 Part I, Section H, and Section H is limited to five (5) pages. Proposers should address these topics within that page limitation and organize their submissions accordingly.
17.	Question: Item 10.e. Rating Criteria, EOI page 10, “Financial Responsibility & Organizational Stability” – Would it be acceptable to respond to this evaluation criteria in a letter placed in the Appendix alongside the Certificate of Insurance?	Answer: Yes, it is acceptable to address Financial Responsibility & Organizational Stability in a letter included in the Appendix, alongside the Certificate of Insurance, provided the response is clearly labeled and organized for ease of review.
18.	Question: Per the RFP, Sections 2.s, page 5, Consultant Services Required: Consultant shall perform engineering and technical services relevant to trackwork which may include, but are not limited to, 2.s, Environmental Analysis may be part of additional services, could MTA specify what the Environmental Analysis scope entails for projects?	Answer: The reference to Environmental Analysis is intended to cover project-specific environmental services that may be required in support of a particular assignment, as applicable. Such services may include, but are not limited to, review of sensitive environmental impacts, investigation of hazardous materials, evaluation of cultural and zoning requirements, and preparation of environmental and forest conservation documentation, including NEPA/MEPA documentation, as necessary to advance the task order. The specific scope of any required environmental analysis will be identified in the applicable work order.

19.	Question: Can MTA confirm whether Section H is strictly limited to five (5) pages, or whether MTA will accept additional pages in Section H to address the expanded Rating Criteria—especially Criterion (b) “Response to Scope of Services: Technical Approach, Project Understanding, and Work Plan”?	Answer: Section H is limited to five (5) pages. Proposers should address the expanded Rating Criteria, including Criterion (b) – Response to Scope of Services: Technical Approach, Project Understanding, and Work Plan, within that page limitation. No additional pages in Section H will be accepted.
20.	Question: Should Section H be structured as a criterion-by-criterion response to the Rating Criteria, or is MTA expecting a more general executive summary narrative with supporting evidence located elsewhere in the SF330?	Answer: Section H should be structured to clearly address the applicable Rating Criteria within the five (5) page limit. A criterion-by-criterion format is acceptable and may assist MTA in its evaluation; however, proposers may use another organization provided the response clearly addresses the required topics, including the applicable Rating Criteria, within Section H and the overall SF 330 submission.
21.	Question: Please confirm whether the inclusion of Criterion (b)—technical approach, project understanding, and work plan—is intentional for the EOI stage (which is typically qualifications-based), and whether MTA expects the same level of detail normally reserved for a technical proposal.	Answer: Yes, inclusion of Criterion (b) at the EOI stage is intentional. MTA expects proposers to provide a concise response addressing technical approach, project understanding, and work plan within SF 330 Part I, Section H and within the stated five (5) page limit. MTA is not seeking the same level of detail typically associated with a full technical proposal at this stage.
22.	Question: The EOI indicates that Key Staff roles require Maryland PE licensure (with the exception of the Inspector role). Please confirm whether all four professional Key Staff (Project Manager, Trackwork Engineer, Civil Engineer, Structural Engineer) must be Maryland-licensed PEs at the time of EOI submittal, and whether the Inspector role is the only Key Staff role exempt from MD PE licensure.	Answer: Yes, the Project Manager, Trackwork Engineer, Civil Engineer, and Structural Engineer are required to hold Maryland PE licensure at the time of EOI submittal. The Trackwork Inspector role is the only Key Staff position exempt from the Maryland PE licensure requirement.

23.	Question: Criterion (e) references financial stability, including items such as financial statements and fiscal controls. Please confirm whether MTA is requiring financial statements or additional financial documentation at the EOI stage, or whether MTA will evaluate financial responsibility based on items already requested (e.g., certificates of insurance, certifications, and SF330 content).	Answer: MTA is not requiring submission of financial statements or additional financial documentation at the EOI stage unless specifically requested elsewhere in the EOI. Financial responsibility and organizational stability will be evaluated based on the information and documentation required as part of the EOI submission, including applicable certifications, proof of insurance, and relevant information provided in the SF 330.
24.	Question: Criterion (c) includes evaluation of change/extra work orders, claims, disputes and resolution effectiveness. Please clarify what MTA expects at the EOI stage: - A narrative statement of overall approach/history, - Specific project-by-project metrics or - No additional information beyond SF330 Section F and references.	Answer: At the EOI stage, MTA expects a project-specific response to this criterion. Proposers should provide a concise narrative in Section H describing relevant experience with change orders, extra work orders, claims, disputes, and resolution effectiveness, supported by representative project examples included in the SF 330 and references, as applicable. For each example provided, proposers should include the number and magnitude of change orders, claims, and disputes, as well as a brief description of how those matters were managed and resolved.
25.	Question: Does MTA expect this information (#6) to be limited to the “past performance” window referenced in the Rating Criteria (e.g., last 5 years), or aligned with the project example window used elsewhere in the EOI?	Answer: This information should be aligned with the past performance period referenced in the Rating Criteria. Proposers should provide project-specific information for the applicable past performance window identified in the EOI, rather than a different project example period used elsewhere, unless otherwise stated.

26.	Question: Criterion (d) references staff availability, current workload commitments and timely delivery capability. Please confirm whether MTA expects firms to quantify staff availability at the EOI stage (e.g., % availability or concurrent task order capacity), or whether a qualitative narrative is sufficient.	Answer: At the EOI stage, proposers should provide a qualitative narrative and may also quantify staff availability by percentage or indicate current concurrent work order capacity, if available. Proposers should provide a concise narrative describing staff availability, current key staff workload commitments/engagement etc., and their ability to commit and deliver services in a timely manner, unless otherwise stated in the EOI.
27.	Question: Given the expanded Rating Criteria and the amount of information potentially needed to respond at the EOI stage, is MTA considering issuing an addendum that clarifies expectations and/or adjusts the EOI schedule?	Answer: Proposers should prepare their submissions in accordance with the requirements and deadlines set forth in the EOI. Please refer to the response to Question No. 12. The EOI due date and time is 2:00 PM on May 1, 2026.
28.	Question: Can we add a subconsultant that is not registered with SDAT but has started the application process?	Answer: No, a proposed subconsultant must be properly registered with SDAT at the time of submission. A firm that has only started the application process but is not yet registered would not meet this requirement.
