

PUBLIC NOTICE
MARYLAND DEPARTMENT OF TRANSPORTATION

AE-25-001-A,B,C,D&E

OPEN-END TRACKWORK ENGINEERING SERVICES

NOTICE TO ARCHITECTS & ENGINEERS

REQUEST FOR PROFESSIONAL SERVICES

The Secretary of the Maryland Department of Transportation (MDOT) has certified the need to utilize the services of architects and engineers for the following project(s).

Firms interested in being considered for work on any Project must submit an Expression of Interest for that Project as set forth herein. The Expression of Interest shall be in an envelope marked with the specified contract number for the Project. The letter portion of the Expression of Interest shall indicate the firm's desire to perform services and indicate the areas of expertise including subcontracted work and to whom. Interested firms must submit the material required herein or the interested firm will not be considered for the Project.

Of all the firms expressing interest in a Project, those adjudged most qualified shall be requested to submit Technical Proposals. Additional information will be supplied to the selected firms so that they can prepare such proposals for the Project. The firm that submits the highest rated Technical Proposal will be requested to submit Price Proposals. This project will be federally funded and Price Proposal cost limitations on payroll burden and overhead shall not apply. However, MDOT reserves the right to require that split payroll burden and overhead rates be submitted appropriate for the type of services to be provided. If negotiations with the firm are timely and successful, a contract may be awarded to that firm. If an interested firm is requested to submit proposals, their proposals should substantially reflect the same composition and area of involvement as their Expression of Interest.

If a Joint Venture responds to a project advertisement, the Department of Transportation will not accept separate Expressions of Interest from the Joint Venture constituents. A firm will not be permitted to submit on more than one (1) Joint Venture for the same project advertisement. Also a firm that responds to a project advertisement as a prime or a prime joint venture constituent may not be included as a designated subcontractor to another firm that responds as a prime to the project advertisement. Multiple responses under any of the foregoing situations may cause the rejection of all responses of the firms involved. The above does not preclude a firm from being set forth as a designated subcontractor to more than one (1) prime responding to the project advertisement.

All questions concerning submissions and procedures must be submitted by email to rmcculley1@mta.maryland.gov no later than 2:00 p.m. on April 14, 2026. MTA number must be referenced in the email subject line. Problems submitting emails shall be reported to MTA's Office of Procurement, telephone number 410-767-3354.

All addendums to this advertisement will be posted only on e-Maryland Marketplace Advantage at <https://emma.maryland.gov>.

Consultants shall have the ability to provide background investigation results for Consultant personnel assigned to work on MTA projects.

All Prime contractors must be registered and "in good standing" with the Maryland State Department of Assessments (SDAT) and Taxation and System for Award Management (SAM) at the time of submittal. Subcontractors must also be registered with SDAT and in good standing. It is strongly recommended that any potential Offeror complete registration prior to the proposal due date and time of submittal. The offeror's failure to complete registration with SDAT may not be considered for the Project.

All submissions must be submitted, one (1) marked "original" and three (3) copies by U.S. Mail or Mail Courier and one (1) by electronic version in Adobe.pdf format by e-mail to Rosilyn McCulley:

e-mail address: rmcculley1@mta.maryland.gov

Maryland Transit Administration (MTA)

Contract Number: AE-25-001-A,B,C,D&E, Open-End Trackwork Engineering Services

1. Project Description:

The Maryland Transit Administration (MTA) owns and operates tracks for heavy and light rail transit in the metropolitan Baltimore area and for freight rail throughout the State of Maryland. The Baltimore Metro heavy rail system has approximately thirty-two (32) track miles. The Light Rail systems (including all spurs) have six-three (63) miles of single and double track. MTA has a number of freight rail lines located throughout the State of Maryland. The MARC (Maryland Area Regional Commuter) Service, operates over one hundred eighty-seven (187) track miles and provides passenger services at 40 stations. The MTA owns 3.5 miles of MARC rail track with operating responsibility. The services is expanding and improvements may be called for system-wide, including stations, maintenance facilities and other miscellaneous structures.

The MTA requires the services of consultants to provide engineering and technical services necessary for the design of track projects, including preparation of contract documents, inspection, laboratory testing, track performance assessment for repairs and modifications, evaluation of maintenance criteria and improvement recommendations, instrumentation, research studies and other miscellaneous services for the MTA on an “as needed” work order basis. Specialty work may be required for tasks such as maintenance forecasting, development of mathematical models, dynamic analysis of track, metallurgical, elastomeric and petrographic analysis and various other work orders.

MTA anticipates awarding five (5) contracts for these services, each for five (5) year duration and not to exceed Fifty Million Dollars (\$50,000,000). MTA reserves the right to modify the number of contracts and the total dollar value of each as deemed appropriate. Project services are anticipated to be funded with Federal and State funds.

2. Consultant Services Required:

Consultant shall perform engineering and technical services relevant to trackwork design, which may include, but are not limited to, any or all of the following:

- a. Assessment of track performance to determine if modifications or repairs are necessary including rails, ties, rail fasteners, fastener anchoring system, special trackwork, contact rail and support system, ballast, sub grade & grade crossings.
- b. Design of modifications, including alterations, improvements and rehabilitation of the track.
- c. Evaluation of maintenance practices and recommendations for improvement concerning techniques to optimize life of track components including track lubrication, rail profile grinding, etc.

- d. Review of design, inspection and maintenance criteria for possible modifications and regulation compliance.
- e. Preparation of reports and recommendations for repairs.
- f. Preparation of Contract Bid Documents including drawings and specifications.
- g. Preparation of construction cost estimates/construction schedules.
- h. Value Engineering & General Engineering Support.
- i. Research, analysis and recommendations on new track components that may reduce maintenance expenditures, provide better ride quality, reduce stray electrical currents, reduce rail corrugations, etc.
- j. Project Management Services such as, but not limited to, monitoring and updating the scope/schedule/budget of the projects; coordinating and resolving project issues; and other related work for managing the projects.
- k. Field inspection services, including survey work, and possible testing and instrumentation. Survey and instrumentation could include measurement of rail corrugations, and measurement of dynamic forces produced by the trains.
- l. Assistance with development of MTA standards.
- m. Laboratory testing of various track components, including fasteners, ties, ballast, etc.
- n. Construction related services including: review of shop drawings and construction contractor submittals for conformance with contract specifications; making site visits during construction to investigate and report on issues of quality and progress; making revisions to the Contract Documents when such revisions become necessary because of adjustments requested by MTA; preparation of drawings, specifications and other documentation and support data; evaluation of construction contractor proposals; and preparation as As-Built drawings showing significant changes in the work made during construction, based on marked-up prints, drawings and other data furnished by the construction contractor.
- o. Track Assets predictive maintenance forecasting and degradation analysis, Data Mining, Data Analytics, AI/ML Integration and Dashboards
- p. Develop a database for Engineering Department.
- q. General Architectural, Civil/Structural/Geotechnical Engineering Services.

- r. Capital Program Technician to work at a MTA office or field location. This individual can be a specialist in the technical details of a subject or discipline or one who has acquired techniques in other areas of specialization or in general, as related to the assistance with the capital projects. Capital Program Technician performs a broad variety of professional, technical and administrative duties in support of capital improvement projects. Depending on the project, duties may include but not limited to providing assistance to Project Managers, Project Engineers, Management and Capital Program staff with: invoicing, document control, configuration management and ProjectWise support, procurement support, facilitate meetings, critical path project schedule reviews, budget and cash-flow analysis, contractor invoice reviews, and development of regular progress reports that assist in the management and delivery of capital projects in all phases of planning, engineering design or construction. Additional duties shall include assistance preparing for regular meetings with FTA, MDE, MDOT and other external agencies.

Engineering and technical services necessary for Capital projects may involve many disciplines, due to the involvement of multiple MTA Offices in capital projects as well as transitional nature of project activities between the MTA Office of Planning and the MTA Office of Engineering & Construction

- s. Consultant may be requested to perform Planning, Preliminary or Final Engineering, Traffic Analysis, Rail Safety Audits, Civil/Structural, Systems Engineering Design, Quality Assurance and Quality Control, Environmental Analysis, Construction Management, Safety Certification or other related services directly for other MTA Offices such as, but not limited to, Planning, Safety, Operations, or different Divisions within the MTA Office of Engineering & Construction on an “as needed” basis. Specialty work may be required for tasks such as maintenance forecasting, development of mathematical models, dynamic analysis of track, metallurgical, elastomeric and petrographic analysis and various other work orders.

3. Specific Type Firm Solicited:

Consultant with knowledge and experience in trackwork design with an established record of achievement in the work orders described in items 1 and 2 above. The firm must have clearly established record in the tasks described above and a proven record of program control to provide the MTA with finished products on time and within budget.

As per State Finance & Procurement, State Government Article 17-701 - 17-707 of the Annotated Code of Maryland the firm(s) selected for a given Contract will be required to provide "Certification Regarding Investments in Iran". Furthermore, selected firms must comply with the State of Maryland Executive Order 01.01.2017.25 Prohibiting Discriminatory Boycotts of Israel in State Procurement. See below 4(f).

4. Required Information:

The Consultant shall submit one (1) original and three (3) copies by U.S. mail or Mail Courier and one (1) by electronic version in Adobe.pdf format of the Expression of Interest, which shall include the following:

Note: All EOI submittals must be bound with both front and back covers. The front covers must clearly display MTA Number, Project Service Title, Firm's Name and be marked as "**Original.**" Sections in the EOI submittals must contain labeled tabs/divers identifying each section. Graphics and photos on the front and back covers are acceptable but will not be considered in the evaluation process.

a. One (1) Letter of Interest - Limited to two (2) pages in total which must contain:

The name, contact numbers and e-mail addresses of the Primary Liaison and your firm's contact for this procurement process.

The information that the Consultant has the financial capacity to provide the services requested, has measures in place to protect the State against errors and omissions.

b. One (1) U.S Government forms Standard Form 330

c. A copy of the Prime/JV's current certificate(s) of insurance.
(Note: MTA's required Professional Liability Coverage for Prime/JV is \$5 Million)

d. The Organizational Chart required for Part I.D of SF330 shall contain at a minimum the Key Staff and defining team organization. In addition, for every individual proposed for this project and shown on the organization chart, the chart shall clearly show their company affiliation and their permanent office location.

Note: U.S. Government forms are to be completed with standard size typing and are not to be photo reduced. Computer generated forms are acceptable; however, the format and spacing is to be identical to that of the Standard Forms (SF 330) unless directed otherwise.

5. Documentation Requirements:

a. The information required for SF 330 Part I.E Resumes of Key Personnel Proposed, Key Personnel, shall be limited to the five (5) Key Staff proposed for performing significant productive time on Project. Provide a brief resume for each of the Key Staff individuals outlined below, limited to five (5) Key Staff per page, not to exceed five (5) pages total.

The Consultant shall only submit information for the five (5) Key Staff individuals; no additional information will be evaluated or considered.

The following disciplines are considered of primary importance for this contract and must be documented under SF330 Part I.E. The five (5) Key Staff will be:

1. Project Manager, (Professional Engineer, license in the State of Maryland) with expertise in managing complex, multi-discipline railroad / rail transit agency projects and a minimum of fifteen (15) years' experience and shall be an employee of the Prime/Joint Venture.
 2. Trackwork Engineer, (Professional Engineer, license in the State of Maryland) with expertise in railroad / rail transit agency projects and a minimum of ten (10) years' track engineering experience and shall be an employee of the Prime/Joint Venture.
 3. Civil Engineer, (Professional Engineer, license in the State of Maryland) with expertise in railroad / rail transit agency projects and a minimum of ten (10) years' experience and shall be an employee of the Prime/Joint Venture.
 4. Structural Engineer, (Professional Engineer, license in the State of Maryland) with expertise in railroad / rail transit agency projects and a minimum of ten (10) years' experience and shall be an employee of the Prime/Joint Venture.
 5. Trackwork Inspector, with expertise in railroad / rail transit agency projects and a minimum of ten (10) years' experience in inspection of rail transit / trackwork and associated structures and shall be an employee of the Prime/Joint Venture or any of the Subconsultants.
- b. The Consultant shall document in writing in SF 330 I.E. that the proposed Key Staff individuals meet the following requirements:
1. The designated Project Manager must be an employee by the Prime/JV
 2. It is not required that the remaining Key Staff personnel be employee of the Prime/JV or be located at the Project Office.
 3. All members of the Key Staff shall be residents of the United States with demonstrated expertise and the disciplines listed.

Where Maryland Registrations are required for the professional Key Staff, the Consultant shall include in block 17 of Part I.E of the SF 330 the words "Maryland Registered" and the Maryland License Registration Certificate Number for the individual.

The Project Manager must be licensed in good standing in the State of Maryland at the time of this solicitation. Without exception, MDOT MTA will allow consultants qualified professional engineers and architects that are currently

registered in other states to be part of the consultant's team with the status of "Maryland Registration Pending" for those individuals at the time of Expression of Interest submittal. Where a consultant proposes an out of state professional engineer or architect, the consultant shall include in block 17 of Part I.E of the SF 330 the words "Maryland Registered Pending" along with the license registration number, discipline, and the US State where the individual is currently registered. Pending status must be resolved at the time of Technical Proposal submittal, if short-listed. Failure of the Consultant to properly document Key Staff requirements in writing will result in the firm being precluded from further consideration for the Project.

The Key Staff individual experiences set forth must have been performed within the past ten (10) years. Preference will be given to those that can demonstrate that the required experience was performed on similar work orders as outlined in Item #2 above.

- c. The information required for Part I.F (Example Projects) of the SF 330, shall be limited to five (5) relevant projects performed within the past ten (10) years, and shall not exceed one (1) page per project in total length. **References will be checked, and it is the Offeror's responsibility to ensure this information is accurate and up to date; otherwise it could result in a lower rating for the Offeror in this area.**
- d. Part I.H of SF 330 shall be limited to five (5) pages to summarize in an Executive Summary form the specialized expertise of the team.
- e. A copy of the Prime/JV's current certificate(s) of insurance.
(Note: MTA's required Professional Liability Coverage for Prime/JV is \$5 Million)
- f. **Investment Activities in Iran:** As per State Finance and Procurement, State Government Article 17-701 – 17-707 of the Annotated Code of Maryland, a firm engaging in investment activities with companies appearing on the Investment Activities in Iran list are ineligible for bid/proposal/award. The Investment Activities in Iran list is located at <https://bpw.maryland.gov/Pages/adv-2013-1.aspx> of the Maryland Board of Public Works (BPW) web site. As per the BPW Advisory No.: 2013-11; Date Issued: January 1, 2013, an officer of the Prime/JV firm shall provide a signed original certification as per language listed on the BPW Advisory page.

The Consultant shall comply with the "Required Information" and "Special Requirements" set forth hereinafter when completing the aforesaid documentation.

6. Special Requirements – Subcontractor(s) Provisions:

To comply with the aforesaid SPECIAL PROVISIONS, list the Proposed Teams in I.C.9 of the SF 330. The Consultants must also include the proposed work for each proposed firm.

7. Contact Representative: Rosilyn McCulley, rmcculley1@mta.maryland.gov

8. Additional Information: MTA reserves the right to develop multiple Reduced Candidate Lists from those firms responding to this advertisement or to make multiple selections from one (1) Reduced Candidate List.

9. Electronic Transfer: By submitting a response to this solicitation, the Consultant agrees to accept payments by electronic funds transfer unless the State Comptroller's Office grants an exemption. The selected Consultant shall register with the EFT Registration, General Accounting Division using the COT/GAD X-10 Vendor Electronic Funds (EFT) Registration Request Form, available at <https://marylandtaxes.gov/divisions/gad/eft-program.php>. Any request for exemption must be submitted to the State Comptroller's Office for approval at the address specified on the COT/GAD X-10 form and must include the business identification information as stated on the form and include the reasons for the exemption.

10. Rating Criteria: The major factors/criteria for the establishment of a Reduced Candidate List for this Project, in descending order of importance, will be:

a. Key Staff Experience & Team Composition:

Evaluation will include:

- Qualifications, certifications, and relevant technical expertise of proposed key personnel.
- Experience of key staff on comparable transit, rail, and trackwork projects of similar size and complexity.
- Clarity of team organization, defined roles and responsibilities, and availability of staff for the duration of the project.
- Strength of project management approach and demonstrated technical leadership.

b. Response to Scope of Services: Technical Approach, Project Understanding, and Work Plan

Evaluation will include:

- Demonstrated understanding of the project scope, objectives, constraints, and key challenges.
- Soundness, feasibility, and appropriateness of the proposed technical approach and methodologies.
- Identification of project risks and effectiveness of proposed mitigation strategies.

- Proposed project schedule, sequencing, coordination procedures, and management controls.
- Application of best practices, innovation, or efficiency improvements relevant to the project.

c. Relevant Firm Experience & Past Performance (last 5 years)

Evaluation will include:

- Demonstrated experience performing services directly related to the scope of this project.
- Successful completion of comparable assignments for MDOT MTA and or other transit agencies, on similar trackwork projects.
- History of delivering projects on time and within budget.
- Quality of work and compliance with contract requirements and performance standards.
- Client references, performance evaluations, and documented performance metrics.
- History of change/extra work orders, claims, disputes, and effectiveness of resolution.

d. Capacity, Resources, and Timely Delivery Capability

Evaluation will include:

- Demonstrated capacity to meet project schedules and deliver required milestones.
- Availability of proposed staff and current workload commitments.
- Adequacy of staffing levels, equipment, and management resources relative to the project requirements.
- Ability to mobilize personnel and resources promptly as project needs arise.
- Use of efficient project delivery methods, tools, or innovations that support timely execution.

e. Financial Responsibility & Organizational Stability

Evaluation will include:

- Financial stability and strength, including financial statements, bonding capacity, and insurance coverage.
- Ability to manage contract cash flow and support the financial demands of projects of similar size and complexity (last 5 years)
- Adequacy of fiscal controls, accounting systems, and internal financial management and timely invoicing practices.
- Organizational stability and capacity to scale resources as needed.

f. Familiarity with local conditions & responsiveness:

Evaluation will include:

- Adequacy of professional liability and other relevant insurance coverage.
- Quality Management Plan, Quality assurance/quality control (QA/QC) procedures and internal review processes.
- Demonstrated approach to preventing design errors, omissions, and rework.
- Proximity to the project and ability to provide timely on-site support.
- Availability of local personnel and knowledge of local conditions, regulations, and jurisdictional requirements.

11. Additional Information:

- a. Ratings developed in the Reduced Candidate's List process for Key Staff individuals and subconsultants proposed may be retained and used in the final selection process.
- b. MTA must be notified in writing, by email to rmcculley1@mta.maryland.gov, of any substitution of Key Staff members after Expression of Interest has been submitted. MTA will re-evaluate the individual substituted using the same criteria used at the Expression of Interest stage. Failure by the Consultant to advise MTA of substitutions will result in the individual (s) substituted not scored in the final selection process.
- c. All Key Staff proposed must be able to and upon selection must take the necessary action to obtain MTA security identification badge immediately after contract notice to proceed as necessary to perform assigned Work Orders.
- d. If selected, the Prime may be required to designate a person as an "Authorized Signer" who shall be responsible for signing Primes and Subconsultant.
- e. All scores will remain confidential for short-listed firms until after final selection.

12. No response received after 2:00 p.m. on the date specified for a Contract will be accepted, no matter how transmitted.

The Expressions of Interest submittal package must include the following:

Expressions of Interest Submittal for MTA Number

Expressions of Interest Service Title

Expressions of Interest Due Date and Time

Firm Name

Firm Address

Respond by: **May 1, 2026** prior to **2:00 noon (Eastern Standard Time)**

RESPOND TO:
